Redstack Japan K.K.  
Yumeshin Holdings Co., Ltd.  
Valhalla Game Studios Co., Ltd.

### **Redstack Japan, Yumeshin Holdings and Valhalla Game Studios have entered into a strategic partnership for BIM operation**

Redstack Japan K.K. (HQ: Kawasaki City, Kanagawa, President: Masaru Aburatani), Yumeshin Holdings Co., Ltd. (HQ: Chiyoda-Ku, Tokyo, President: Daio Sato) and Valhalla Game Studios Co., Ltd. (HQ: Minato-Ku, Tokyo, CEO: Satoshi Kanematsu) have announced today they have entered into an strategic partnership to collaborate on education, consultation and solution development business in the field of BIM (\*1) which is expected to quickly expand its market in the days ahead.

#### 1. Purpose

Redstack Japan which already has advanced know-how of BIM operation and global business network in the field of construction business, Yumeshin Holdings which retains approximately 5,000 top-caliber construction managing engineers in Japan, and Valhalla Game Studio which has higher development ability and technical capability applicable to various field of business, work together to provide BIM service and solutions in the promising BIM market, taking maximum advantage of their "human resources," "technologies," and "big data." This is the purpose of this partnership.

#### 2. "BIM Training Room" will be established

As the first shot of this collaboration, "BIM Training Room" will be established at Kyobashi business office of Yumeshin Holdings which provides elite education program for BIM engineers. This is a high value-added training program which allows students to learn manipulation method of "FUZOR" (\*2) to process large-scale design data smoothly as well as other BIM trainings.

Redstack Japan, Yumeshin Holdings and Valhalla Game Studios closely work together to expand this new business field towards the future and provide the most advanced and the newest BIM solutions to their clients.

\* 1 BIM stands for "Building Information Modeling," which is a process involving the generation and management of digital representations of physical and functional characteristics of places. It is, so to speak, three-dimensional data base of architectural structures, which includes generation of 3D modeling data from 2D drawings and provides administrative information such as costs and finishing methods. Taking advantage of BIM process allows us to choose an optimal environmental performance and construction method in every work process and to make a lean and cost-efficient construction planning.

\* 2 FUZOR is a BIM simulation software developed by KALLOTECH (HQ: San Diego, USA). It was originally developed as a plug-in for AUTODESK's 3D software REVIT and it now allows its users to operate various CAD data seamlessly. The greatest feature of "FUZOR" is that it is using original 3D game engine instead of common CAD engine, which allows users to handle extraordinary large-scale data with amazing speed. It also allows users to modify 3D data objects retained by 3DCAD bi-directionally on a real-time basis. "FUZOR" is a BIM solution software being used by more than 600 corporate users in the U.S.

【Yumeshin Holdings Co., Ltd.】

Yumeshin Holdings Co., Ltd. is a unique public company which engages in construction engineer dispatch business in Japan. In the construction business industry which has a serious shortage of younger generations, 70% of 5,000 engineers currently enrolled at Yumeshin Holdings are 20s. Yumeshin Holdings is providing manpower most required by the industry and growing further. Yumeshin Holding is also positive in shareholder return and its average dividend payout ratio in the past 5 years is more than 100%: a rare company which goes together with "high growth" and "high dividend." Pay attention to Yumeshin Holdings which aims for further growth with active employment of high-grade engineers.
